👤 PROFILE

I am a dedicated, professional, and hard-working web developer with freelance experience in building professional websites. I am experienced in technologies like HTML, CSS, Next.js, React.js, Node, and multiple others. Looking for a part-time, remote position as a front-end or full-stack web developer.

💼 EMPLOYMENT HISTORY

Full-Stack Web Developer at RocketWizard, Zadar
March 2022 — June 2022

Created a full-stack website from scratch with a unique design provided by a designer, authentication system, large database, subscription system, email notifications, and many other features. Also, worked on a large back-end system with a large-scale API system used for the copy trading system.

Front-End Web Developer at Ebankc, Zadar
January 2022 — February 2022

Worked on design and front-end for a large DeFi banking web application that allows users to earn interest, borrow, and exchange digital assets, all on their own, with very competitive APY interest rates. I worked on developing more than 14 pages, and making them responsive on all devices.

Full-Stack Web Developer at Honeycomb, Zadar
September 2021 — October 2021

Developed the front-end according to the design provided by the designer which included a Gantt chart and a drag and drop feature for tasks, and developed and connected a Firebase back-end system to the front-end.

🎓 EDUCATION

Strukovna Škola Vice Vlatkovića, Zadar
October 2019 — June 2023

Computer technician specializing in programming
